Pharmaceutical Compliance Auditing

USIS Healthcare Solutions offers an unmatched suite of services customized to protect your health care program's integrity and detect and deter fraud. These include our expertise in Pharmaceutical Compliance Auditing.

In 1987, the U.S. Food and Drug Administration passed the Prescription Drug Marketing Act (PDMA) that requires drug manufacturers or authorized distributors to conduct random audits, physical inventories and reconciliations of stock maintained by sales representatives.

USIS Healthcare Solutions is a leading provider of pharmaceutical audits. Our field staff annually audits thousands of pharmaceutical representatives to ensure samples are stored in accordance with the labeling guidelines and the client's standard operating procedures. We perform both random and regularly scheduled inspections and submit written reports in the client-specified format. With staff located throughout every U.S. state and territory, USIS Healthcare Solutions can respond quickly to any client need.

We also conduct site reviews of pharmacies, clinics and medical practices. In these reviews, we obtain compliance agreement forms, conduct interviews, assess controlled substance profiles, identify "red flags" that signal fraudulent practices and take appropriate photos. Our verification processes include validation of registration numbers, schedules, expiration dates, registration category and the facility's primary activity.

USIS Healthcare Solutions offers end-to-end pharmaceutical compliance services that are not only timely and secure, but also more efficient and less costly than contracting with multiple vendors.

Choose USIS Healthcare Solutions for our extensive resources and expertise in pharmaceutical compliance auditing
